

PROTECT YOUR SKIN AND STILL GET YOUR VITAMIN D!

Wearing sunscreen helps protect your skin from damaging rays, but the amount of vitamin D3 your body would naturally make from exposure to sunshine becomes lower. Have the best of both worlds!

For a limited time*, save 30% on ARTISTRY® Tinted Moisturiser when you purchase NUTRILITE® Vitamin D3 2000 IU plus vitamin K2. Research shows that most people don't get enough vitamin D in their diet or through sun exposure. Vitamin D helps the body absorb calcium for strong bones and teeth, and new research shows that it also supports breast, colon, and immune system health. And, with ARTISTRY Tinted Moisturiser, you'll get all-day moisture, a glowing hint of colour, and sun protection – all in one perfect product.
