

Bone Health Brochure will help to strengthen your business!

People depend on their bones to do everyday things like walk, lift, or sit. Most people are not aware that they need to take care of their bones every day to ensure strong bone health at every age.

This *Bone Health* Brochure provides information and NUTRILITE® products that can help your customers protect and build their bones at any age – 20s, 30s, 40s, 50s, and beyond. If your customers are young, it is a prime time to talk about the benefits of building a “savings account” of calcium for the future, and if your customers are older, you can talk with them about activities and supplements that will help to keep their bones strong to support their active lifestyle.

To help get you started, here are some open-ended questions you could ask about bone health:

- What do you do to make sure you get enough calcium for strong bones?
- Why do you want to stay healthy and keep your bones strong?
- If there was something you could do to improve your bone health, what would that be?

The *Bone Health* Brochure provides bone health dos and don'ts for 20s, 30s, 40s, 50s, and beyond, food first options, and NUTRILITE supplements for getting enough calcium, magnesium, vitamin D, and vitamin K – the cornerstones for healthy, strong bones. You will be able to expertly answer the above questions and help your customers participate in a full, active lifestyle at any age!

Key NUTRILITE products that are featured in the *Bone Health* Brochure include:

- NUTRILITE DOUBLE X® Vitamin/Mineral/Phytonutrient
- NUTRILITE Daily Multivitamin/Multimineral
- NUTRILITE Cal Mag D
- NUTRILITE Vitamin D3 2000 IU plus vitamin K2
- NUTRILITE Women's Supplement Pack
- NUTRILITE Men's Supplement Pack
